Minimum 10 pcs

Digital is a revolutionary new way of decorating uniform apparel. It is a hybrid of an inkjet and the traditional process of a heat applied transfer, but produces a higher quality finish than traditional digital transfers with much brighter colours. So what makes it stand out:

Colour Vibrancy – Digital transfer brings colour brightness and vibrancy to life. Super smooth gradient profiles and pixel sharp photographic images also.

Fine detailing for complex logos – When a logo has fine detail components or small text most of the time you usually need to set the art up on a 'block' background with standard digital transfers. This may alter the look of the logo, Supacolour allows for a true representation.

40mm x 40mm

60mm x 60mm

210mm x 150mm

300mm x 75mm

105mm x 420mm

300mm x 300mm

300mm x 210mm

CAD CUT & DIGITAL TRANSFER SERVICES

COST-EFFECTIVE TRANSFERS FOR SHORT -RUN ITEMS

At Maxprint, we like to cut costs for our customers wherever possible. Cad Cut digital transfers are perfect for short -run items that need a fast turnaround, and our team are extremely experienced, achieving great results in a small timeframe. With the option of a full CMYK printed transfer cut into any shape, or a range of coloured vinyl for names and numbers, our service is the way to go for your short -run items.

Bring some personalisation to your tees, add a team name or number to sports gear, brand your business equipment an d more with our Cad Cut digital transfer services! Our quick turnarounds don't sacrifice the quality of your product, so you can create personalized designs and get your name or business out there quickly.

DIGITAL - CAD CUT

FILE TYPES:

Vector file formats:.eps, .ai, .cdr Bitmap file formats:.jpg, .bmp, .tif, .psd, .png All bitmap images must be over 300dpi.
Digital transfers are a CMYK process and therefore we can accept bitmaps. Please size 1:1 and make sure that the image is at lease 300DPI. The printer can achieve 720dpi so the bigger file the better the print will be.

For Cad Cut names and numbers you need to specify the font and the size.

DIGITAL HEATPRESS FILES IN GENERAL
FILE TYPES:

Vector file formats: .eps, .ai, .cdr Bitmap file formats: .psd, .png All bitmap images must be over 300dpi.

Vector files produce the best results.

CMYK strongly recommended (RGB will be converted)
Optional: Pantone (PMS colourbook codes only)
Convert fonts to outlines
Convert strokes to objects
Embed any linked images
Use a transparent background for free-floating art
No fades or glows on free-floating art (Use clipping path to make sharp edges)
Save as PDF (also acceptable: .ai, .eps)

Digital Vinyl Transfer with World's Best Stahl's Vinyl

> ### Minimum 10 pcs
> Ideal for small and detailed multicoloured logos. The design is printed on vinyl and heat transferred to garments. Transfer technology has progressed remarkably in the last 10 years and are comparable to Screenprinting in finish and quality - no longer do they flake off after a wash.
> - **Numerals are available in the following font in white, black, navy, gold, red and forest green:**
